“Coreprint gives our customers complete control of proofing, ordering and even paying for the cards. The library allows customers to easily place exact repeat orders and both simplifies and speeds up the whole process”

Scott Rudd - Studio Manager - Darenth Print

One of the world’s most open, robust and scalable ‘cloud based’ Web2Print services.

In today’s business environment of ever-tighter margins and increasing demands for 24/7 delivery, we have to ensure that we can keep costs down while offering you the very best standards of customer service.

Coreprint enables you to harness Web2Print services to manage print online. Instead of the costs and time implications of ordering and checking proofs, you can review documents online quickly and easily. You benefit from convenient and flexible printing solutions, at compelling value for money.

The solution is fully scalable, enabling you to print as much or as little as you need.

From simple business stationery, through to full marketing collateral including personalisation, direct mail and QR code generation, Coreprint makes anything possible.

Giving you complete control

Coreprint’s Web2Print solution means you can set up permissions-based printing, giving you total control over who prints what and when. The system is compliant with any browser, and is flexible enough to integrate with your current websites, production workflows, as well as the ability to integrate into your procurement systems.

Web2Print Explained.

Web2Print Explained.

Web2Print lets you access your brand-governed templates of print and non-print related collateral over the web, anytime from anywhere. View, amend, proof and order anything from standard stock, through to personalised products. It can even allow you to manage cross channel marketing, offering a true cross media solution.

An impressive track record

An early entrant in Web2Print services, Coreprint has unparalleled experience in providing online printing solutions for clients and is compliant with all UK data laws. With over 1,500 customers, including household names in corporate, retail, financial, pharmaceutical and public sectors, Coreprint services all print providers, large and small.

A user-friendly solution

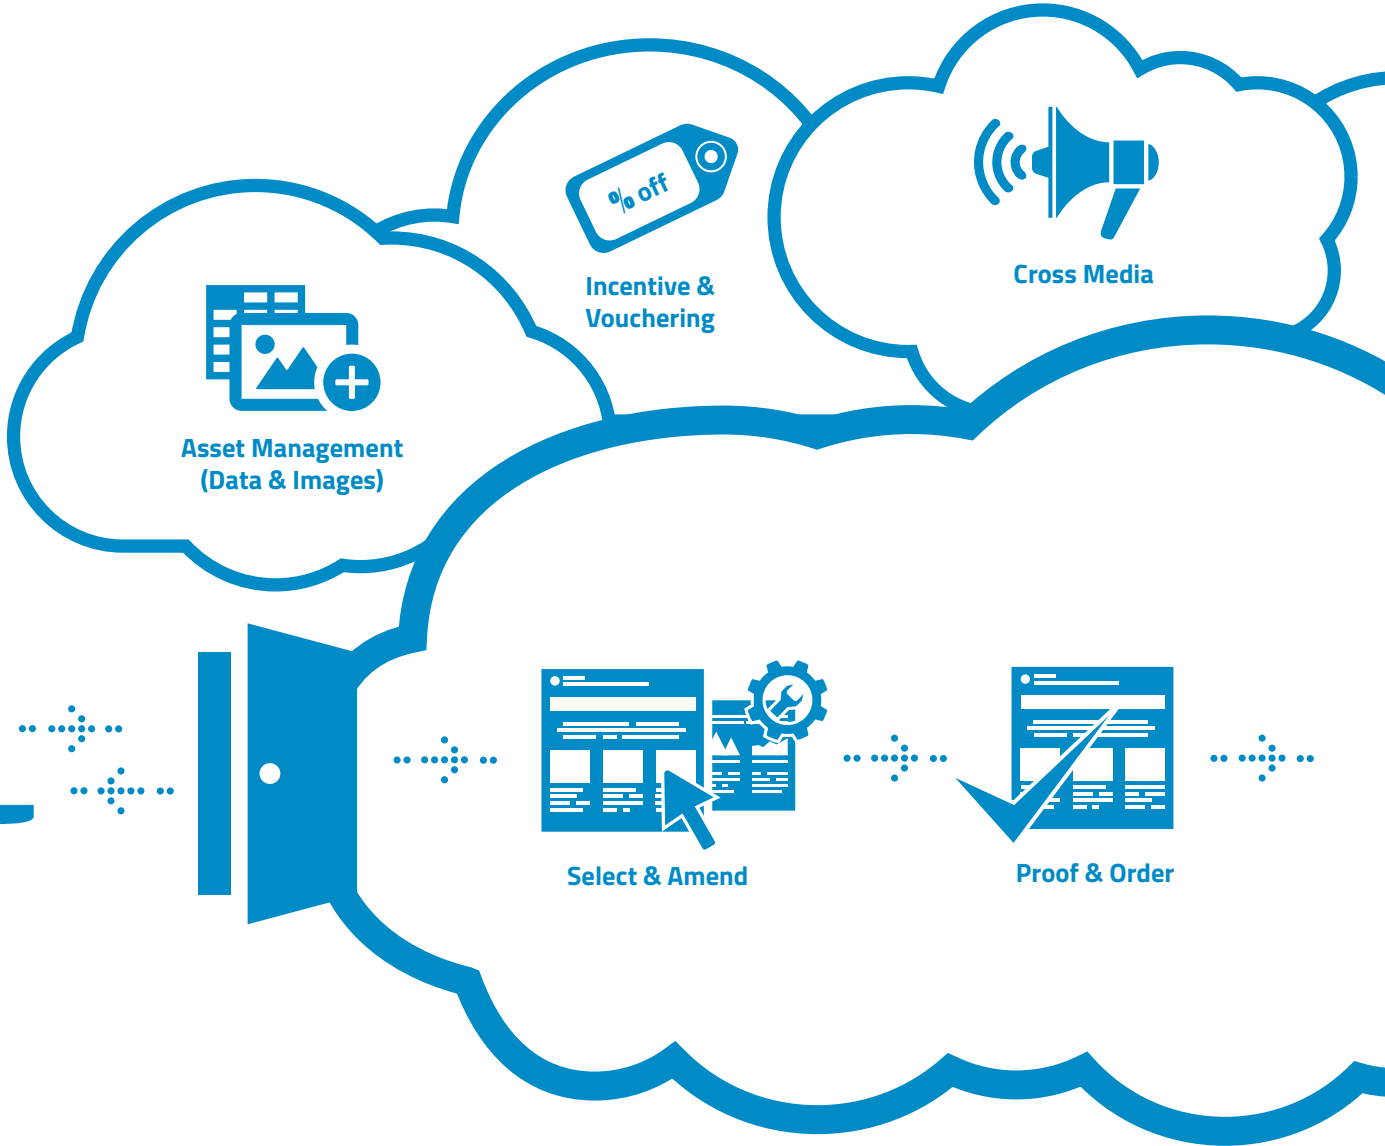

Coreprint offers Software as a Service (SaaS), enabling access to print and design software solutions on demand via your browser. No expensive software to maintain or install, instead you enjoy instant access to effective and efficient printing online. The system is extremely user-friendly and intuitive, making design and print easy for you.

A strong partner for your business

By choosing to use our Web2Print software you will benefit from:

“ The front end of the system is fully customisable to your brand, we can style this however you like, it finished off the system wonderfully”

Scott Rudd - Studio Manager

Many leading businesses and public sector organisations are already familiar with managing print via Web2Print solutions. In times of economic uncertainty, it is a powerful tool in cutting spend on administration and internal processes, enabling you to secure and maintain a competitive advantage.

Coreprint helps you streamline your business, enhance your internal ordering process and cut down on waste.

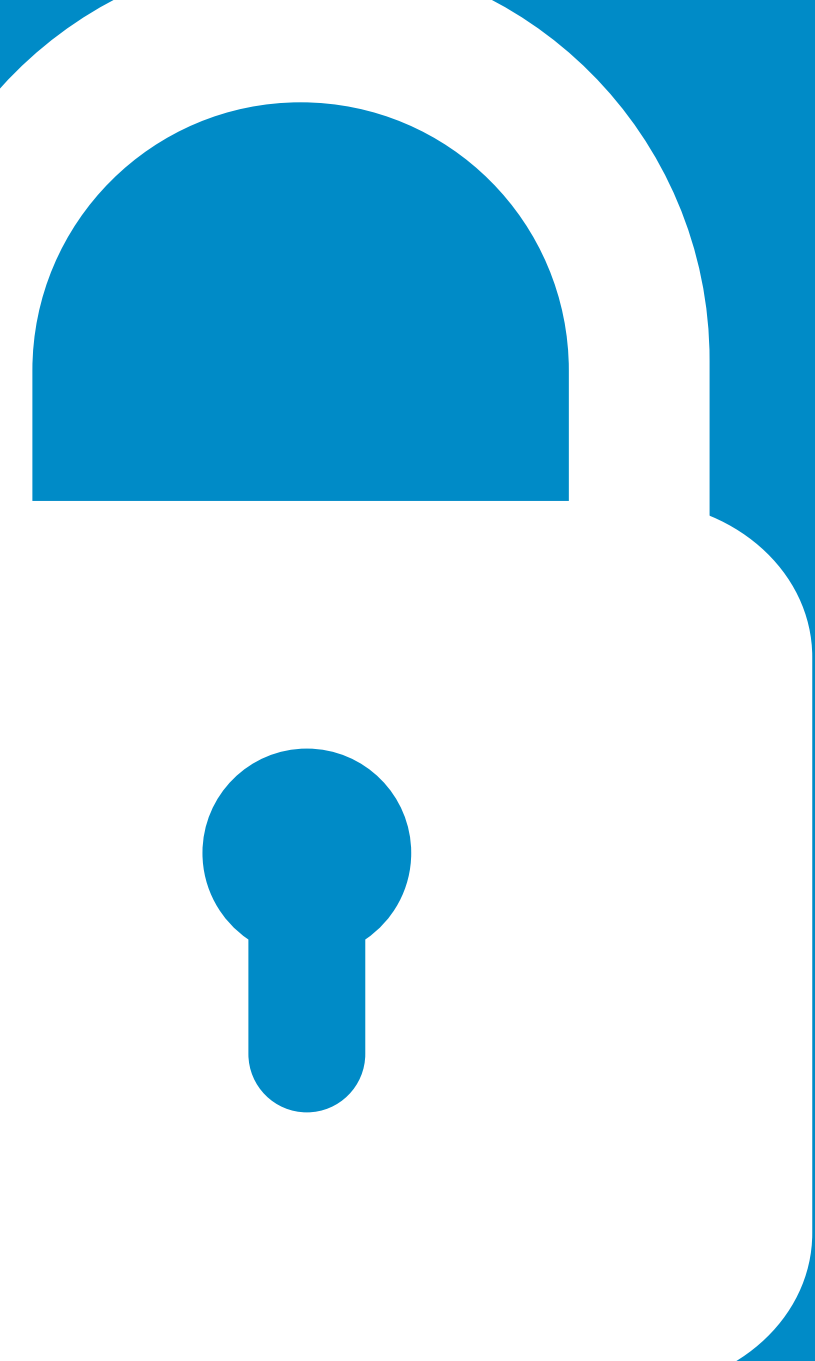

- Web2Print secures relationships with clients, helping you keep customers for the long term
- Protects your brand integrity using fixed templates
- Cuts amounts spent on communications, production and administration
- Keeps your data secure, enabling compliance to UK Data Laws
- Easy to use – no software to load or manage on either side, avoiding resistance from customer IT protocols or management
- Truly scalable and open
- You can access and store your own assets
- Variable Data Printing and personalisation
- QR code generation to trigger augmented experiences
- Choice of payment methods, including a credit account or payment by credit card
- Creates PDF proofs for internal approval for procedures if required
- Through the line marketing communications, offering a true Cross Media solution, all in one package
